

Case Study - SSE

Leading energy supplier, SSE, partnered with Hiring Hub back in October 2018 to help them compliantly recruit for specialist roles with speed and ease, beyond using their PSL alone.

Hiring Hub's recruitment agency management Portal was built for in-house recruitment teams seeking greater flexibility, visibility and control of third-party hiring across their organisation

Portal has given companies like SSE the ability to speed up and simplify their recruitment process by allowing them to manage agencies more efficiently by centralising agency admin & comms, accelerating their onboarding and stopping them

having to field calls & CVs. It also allows them to find and work with new, specialist suppliers on an ad hoc basis, compliantly and scale their recruitment activity in hours, without scaling fixed costs.

“ Hiring Hub offers a fantastic solution for us, helping us work with boutique recruitment agencies quickly and compliantly when we have to go beyond our PSL for ad hoc, specialist roles. A friction-free, fast process, it means our internal team can meet the demands of hiring managers and the business in an agile and cost-effective way. ”

Scott Duffy, Resourcing Consultant at SSE
